

Drones4STEM meet the public! Final Event, 8th September, Athens

IDEC, with the support of HOU and all partners, organised a transnational educational event on Monday 8 September in TITANIA hotel in Athens. The event focused on the presentation of all project's outcomes (use cases, e-learning course, piloting, etc.) while during the practical session it focused on the demonstration of the use cases with drones. The participants were able to see how through app-based drone operations, they can use simple commands that enable them to program drone's flight movements. They were also able to see through demonstration practical methods for collecting data in the field and automatically saving it to files for later analysis. More than 70 Greek and international participants took part in the event, creating a lively, multicultural learning environment. The feedback collected was extremely positive as they described the event as engaging, hands-on, and directly applicable to STEM education. The event provided interpretation in the Greek Sign Language, which enabled the participation of numerous participants from vocational schools for deaf.

4th Transnational Partners' Meeting, 9th September, Pireaus

The Drones4STEM partnership met in Greece (Piraeus) to define the last actions to be taken in view of the imminent conclusion of the project, to evaluate, validate and approve the results achieved.

In particular, the following aspects were focused:

- ✓ Drone missions for STEM – Use Cases: piloting, videos, improvements, translations are finalized and will be accessible both in the project website and in the E-learning Training programme for teachers.
- ✓ The platform itself is working properly after the migration on a new server. Feedback from more than 100 users were analysed.
- ✓ Impact and Sustainability: the Community of practice reached more than 140 members and it is fully operative and lively ensuring the future sustainability for the project.

The D4STEM Community of Practice is....

an open innovation space for collaboration at EU level to share common interest and knowledge, to solve common problems, and to improve skills.

D4STEM CoP is a large community involving (by the end of the project) 147 members so far!

Members are representing all educational levels (especially secondary education), STEM Institutions, ICT developers and stakeholders.

What in the CoP?

- ✓ Topics for discussion (specific polls will be developed)
- ✓ Food for thought (i.e. articles, videos, practices, etc.)
- ✓ Events promoted within the CoP (workshops, seminars, etc.).

Join the CoP on Facebook
